

KNOW YOUR INSURANCE

Your insurance policy is a contract between you and your insurance company. Insurance policies vary, even within the same company.

Your insurance company has a final say on what is covered and not covered under your policy. *We do not* verify coverage or eligibility for you.

All questions about your coverage should be directed to your insurance company.

As the patient and insured person, it is your responsibility to know your insurance and verify you have coverage for the medical services you seek. If the services are not covered by your insurance, you may ultimately be responsible for the cost of these services.

We appreciate your understanding
